

### Checklist: CARRY-ON LUGGAGE

Be strategic when packing your carry-on luggage. Be sure to research:

1. any size and weight restrictions for carry-on luggage
2. whether any items are prohibited in your destination or in countries you transit through

(Typical guidelines for flights may include: size and weight restrictions + liquid and sharp objects.)

Then think about what's essential to have on hand and what you need to stay safe and comfortable in case of delays.

### Checklist

- All of your travel documents
- Electronic equipment, like a laptop, tablet or your phone
- A small amount of cash
- Any medication you need daily
- Comfort items such as toiletries hand-wipes and hand sanitizers
- Spare underwear

Keep your valuables with you during transit (travel documents, phone, and identification). Avoid placing them in overhead lockers.
